SOFTWARE ENGINEER

Final year Electronics and Telecommunication Engineering student with Software Development Engineer internship experience and hands-on full-stack development across frontend, backend, databases, APIs, testing, debugging, deployment, and DevOps. Experienced with React, TypeScript, JavaScript, Node.js, Python, SQL, Docker, Git, Supabase, and cloud technologies. Strong in end-to-end application development, authentication, REST APIs, database integration, testing, CI/CD, troubleshooting, and software delivery.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C, SQL
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Vite, React Leaflet
- **Backend:** Node.js, Express.js, REST APIs, JWT, Authentication, Authorization, JSON, API Integration
- **Databases:** PostgreSQL, Oracle SQL, MongoDB, Firebase, Firestore, Supabase
- **AI/ML:** TensorFlow, Gemini API, Python Model Integration, Image Analysis, AI API Integration
- **Cloud/DevOps:** AWS, EC2, S3, RDS, Docker, Linux, Git, GitHub, CI/CD, GitHub Actions, Deployment
- **Testing:** API Testing, Unit Testing, Integration Testing, Functional Testing, Debugging, Data Validation, SDLC, Agile

EXPERIENCE

MCMH

June 2026 to September 2026

Software Development Engineer Intern

- Developed full-stack application features using React, TypeScript, Vite, Supabase, REST APIs, and Git within a real-world software product.
- Implemented UI components, application logic, API integration, authentication, database operations, validation, and feature workflows across the SDLC.
- Tested and debugged UI behavior, API responses, database operations, edge cases, and data flows to improve application reliability.
- Used Git workflows for source control, feature development, debugging, code changes, and application integration.

SOFTWARE DEVELOPMENT PROJECTS

OneMeal | AI Powered Food Donation Platform

[GitHub](#)

[Live Demo](#)

- Built a full-stack React and TypeScript platform connecting food donors, NGOs, and receivers through donation, authentication, and location workflows.
- Implemented Firebase Authentication and Firestore for secure access, real-time data synchronization, persistent storage, and application state.
- Integrated Gemini API for food image analysis, Google Translate API for multilingual support, and React Leaflet with OpenStreetMap for location tracking.
- **Tech:** React.js, TypeScript, Vite, Firebase, Firestore, Gemini API, REST APIs, Tailwind CSS

AI Stroke Detection System | Full Stack AI Project

[GitHub](#)

- Developed an end-to-end full-stack system for authenticated CT scan uploads, stroke classification, lesion mask generation, and result visualization.
- Built React and Express.js interfaces with REST APIs, JWT authentication, MongoDB, file uploads, and Python model integration.
- Connected image upload, Python inference, TensorFlow processing, database persistence, and dashboard visualization into one application pipeline.
- **Tech:** React.js, Node.js, Express.js, REST APIs, MongoDB, Python, TensorFlow, Docker

OneOps | AI Incident Commander for Real Devices

[GitHub](#)

[Live Demo](#)

- Developed an incident response platform covering detection, engineering context, source inspection, diagnosis, remediation, verification, and incident memory.
- Integrated Node.js REST APIs and GitHub API workflows for repository inspection, structured processing, validation, troubleshooting, and controlled software changes.
- Designed reproducible diagnosis and recovery workflows connecting incident context, proposed fixes, verification, and operational history.
- **Tech:** JavaScript, Node.js, REST APIs, GitHub API, Git, Docker

EDUCATION & LEADERSHIP

Education

N. B. Navale Sinhgad College Of Engineering, Solapur

B.E. in ENTC | 8.43 SGPA till Sem VI | 2023–2027

HSC | 77.23% | MGSM's Arts, Science and Commerce College, Chopda

Leadership & Achievements

Associate General Secretary & Departmental Cultural Secretary, NBNSCOE

Hackathon Success: 1× Winner, 2× Top 4 Finishes

Languages: English, Hindi, Marathi
